Hoop

Designing **Flavor.**

Four letters just four pieces!

Hoop is an innovative **radial infusion brewer** created by Ceado, and the winner of **Best New Product Award**: Consumer coffee preparation & serving equipment.

Hoop is a radial infusion brewer. Water filters evenly through the coffee bed, in a smooth and regular way, thanks to the side holes at the bottom of the Flow Tower. The flow of the water through the holes guarantees an even extraction: the water filters through the coffee with the same quantity and strength, reaching the paper filter only after completing the journey through coffee. Hoop allows to achieve a full and high quality extraction, with no effort!

Radial Infusion.

Hoop

Coffee brewer

Features

- Durable BPA free plastic
- Easy to clean
- Dishwasher safe

Technical data

Net weight	165 g
Gross weight	260 g
Dimensions	150 x 140 x 90h mm
Colors	

With Hoop there is no need to follow rules or techniques. There is no need to pay attention to the water temperature or the coffee beans. Hoop wants you to experiment, to combine and to set your own rules, according on your own taste!

Note: Maximum weight on paper filter: 20g of ground coffee.
